

Aim:

Write a Python program to create a menu-driven bank account system. The program should display different bank account details based on the user's choice.

Implement separate functions to perform the following operations:

- Display the current balance.
- Display the statement of the last 1 month.
- Display the statement of the last 3 months.
- Display the statement of the current financial year.
- Exit the program.

The program should repeatedly display the menu until the user chooses to exit.

Input Format:

- The first line of input is an integer representing the user's choice with the prompt "Enter your choice:".
- The user may enter multiple choices until the Exit option is selected.

The menu options are:

1. Display Current Balance
2. Display Last 1 Month Statement
3. Display Last 3 Months Statement
4. Display Current Financial Year Statement
5. Exit

Output Format:

Based on the user's choice:

- If the choice is 1, display the current account balance.
- If the choice is 2, display the transactions of the last 1 month.
- If the choice is 3, display the transactions of the last 3 months.
- If the choice is 4, display all transactions of the current financial year.
- If the choice is 5, display "Thank You" and terminate the program.
- For any other choice, display "Invalid Choice".

Refer to visible testcases for better understanding.

Note:

The program uses a predefined list of transactions.

- For the Last 1 Month Statement, display the last two transactions from the transaction list.
- For the Last 3 Months Statement, display all transactions available in the transaction list.
- For the Current Financial Year Statement, display all transactions available in the transaction list.
- No date-based calculations or filtering are required. The statements should be displayed using the predefined transaction records provided in the program.

Source Code:

`bankAccStatement.py`

```
from datetime import datetime  
  
# Sample Transactions
```

```
transactions = [
    ("05-04-2025", "Deposit", 10000),
    ("20-04-2025", "Withdrawal", 2000),
    ("10-05-2025", "Deposit", 5000),
    ("25-05-2025", "Withdrawal", 1000),
    ("15-06-2025", "Deposit", 8000),
    ("05-07-2025", "Withdrawal", 3000)
]

balance = 50000

def display_balance():
    # Write your code..
    print("CURRENT BALANCE")
    print(f"Available Balance = {balance}")

def last_one_month():
    # Write your code..
    print("LAST 1 MONTH STATEMENT")
    for date,tx_type,amount in transactions[-2:]:
        print(f"{date} {tx_type} {amount}")

def last_three_months():
    # Write your code..
    print("LAST 3 MONTHS STATEMENT")
    for date,tx_type,amount in transactions:
        print(f"{date} {tx_type} {amount}")

def financial_year():
    # Write your code..
    print("CURRENT FINANCIAL YEAR STATEMENT")
    for date,tx_type,amount in transactions:
        print(f"{date} {tx_type} {amount}")

while True:
    print("1. Display Current Balance")
    print("2. Display Last 1 Month Statement")
    print("3. Display Last 3 Months Statement")
    print("4. Display Current Financial Year Statement")
    print("5. Exit")

    choice = int(input("Enter your choice: "))

    if choice == 1:
        display_balance()

    elif choice == 2:
        last_one_month()

    elif choice == 3:
        last_three_months()

    elif choice == 4:
        financial_year()

    elif choice == 5:
```

```

        print("Thank You")
        break

    else:
        print("Invalid Choice")

```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
1. Display Current Balance
2. Display Last 1 Month Statement
3. Display Last 3 Months Statement
4. Display Current Financial Year Statement
5. Exit
Enter your choice:
1
CURRENT BALANCE
Available Balance = 50000
1. Display Current Balance
2. Display Last 1 Month Statement
3. Display Last 3 Months Statement
4. Display Current Financial Year Statement
5. Exit
Enter your choice:
2
LAST 1 MONTH STATEMENT
15-06-2025 Deposit 8000
05-07-2025 Withdrawal 3000
1. Display Current Balance
2. Display Last 1 Month Statement
3. Display Last 3 Months Statement
4. Display Current Financial Year Statement
5. Exit
Enter your choice:
3
LAST 3 MONTHS STATEMENT
05-04-2025 Deposit 10000
20-04-2025 Withdrawal 2000
10-05-2025 Deposit 5000
25-05-2025 Withdrawal 1000
15-06-2025 Deposit 8000
05-07-2025 Withdrawal 3000
1. Display Current Balance
2. Display Last 1 Month Statement
3. Display Last 3 Months Statement
4. Display Current Financial Year Statement
5. Exit
Enter your choice:
5
Thank You
